RFI/Sources Sought for MDE

December 11, 2014

The Department of Defense (DoD), Washington Headquarters Services (WHS), Acquisition Directorate (AD) has issued a notice seeking sources capable of providing a Master Data Repository tool that meets DTIC's requirements.
DTIC's goal is to consolidate, unify, manage, control, search, analyze, and disseminate scientific and technical data using a single tool. Consolidation of the data into a single tool will ease and facilitate analysis, management, and control. A single tool is desired to replace the numerous legacy technologies; reduce the number of required skill sets; reduce risk by eliminating many processes, interfaces, and points of integration; and gain efficiencies by applying policies, features, validation rules, and data quality improvements once rather than in multiple data flows.

A detailed narrative for this opportunity is posted on FBO at the following URL:
